

OUR COMMITMENT TO TANZANIA.

Our social responsibility is vitally important to who we are as a company.

We are proud to share with you just how Lemala has remained committed to upholding these values and responsibilities. Take a further look into how we have supported our local environment and communities through employment, local food sourcing and minimalising our carbon footprint.

LEMALA'S LOCAL FOOD SOURCE

Karatu, Tanzania
We purchase our coffee from the Coffee Farm Estates in Karatu.

Arusha, Tanzania
Mushrooms are purchased from a local lady, Jane, who has her own mushroom farm. Her business was originally formed to make extra money to support her family, but it has now grown big enough to supply all our properties.

Tanga, Tanzania
Source for our dairy products, specifically milk, from a group of dairy farmers who farm in the Tanga Region.

East Coast, Tanzania
We source our fish produce from a local distributor, Joseph, who works with local fishermen from the East Coast. All fish are caught according to individual quota regulations and purchases are shared between the group.

Our Lemala HQ
All goods and fresh produce are packed and sent straight to our properties around Tanzania.

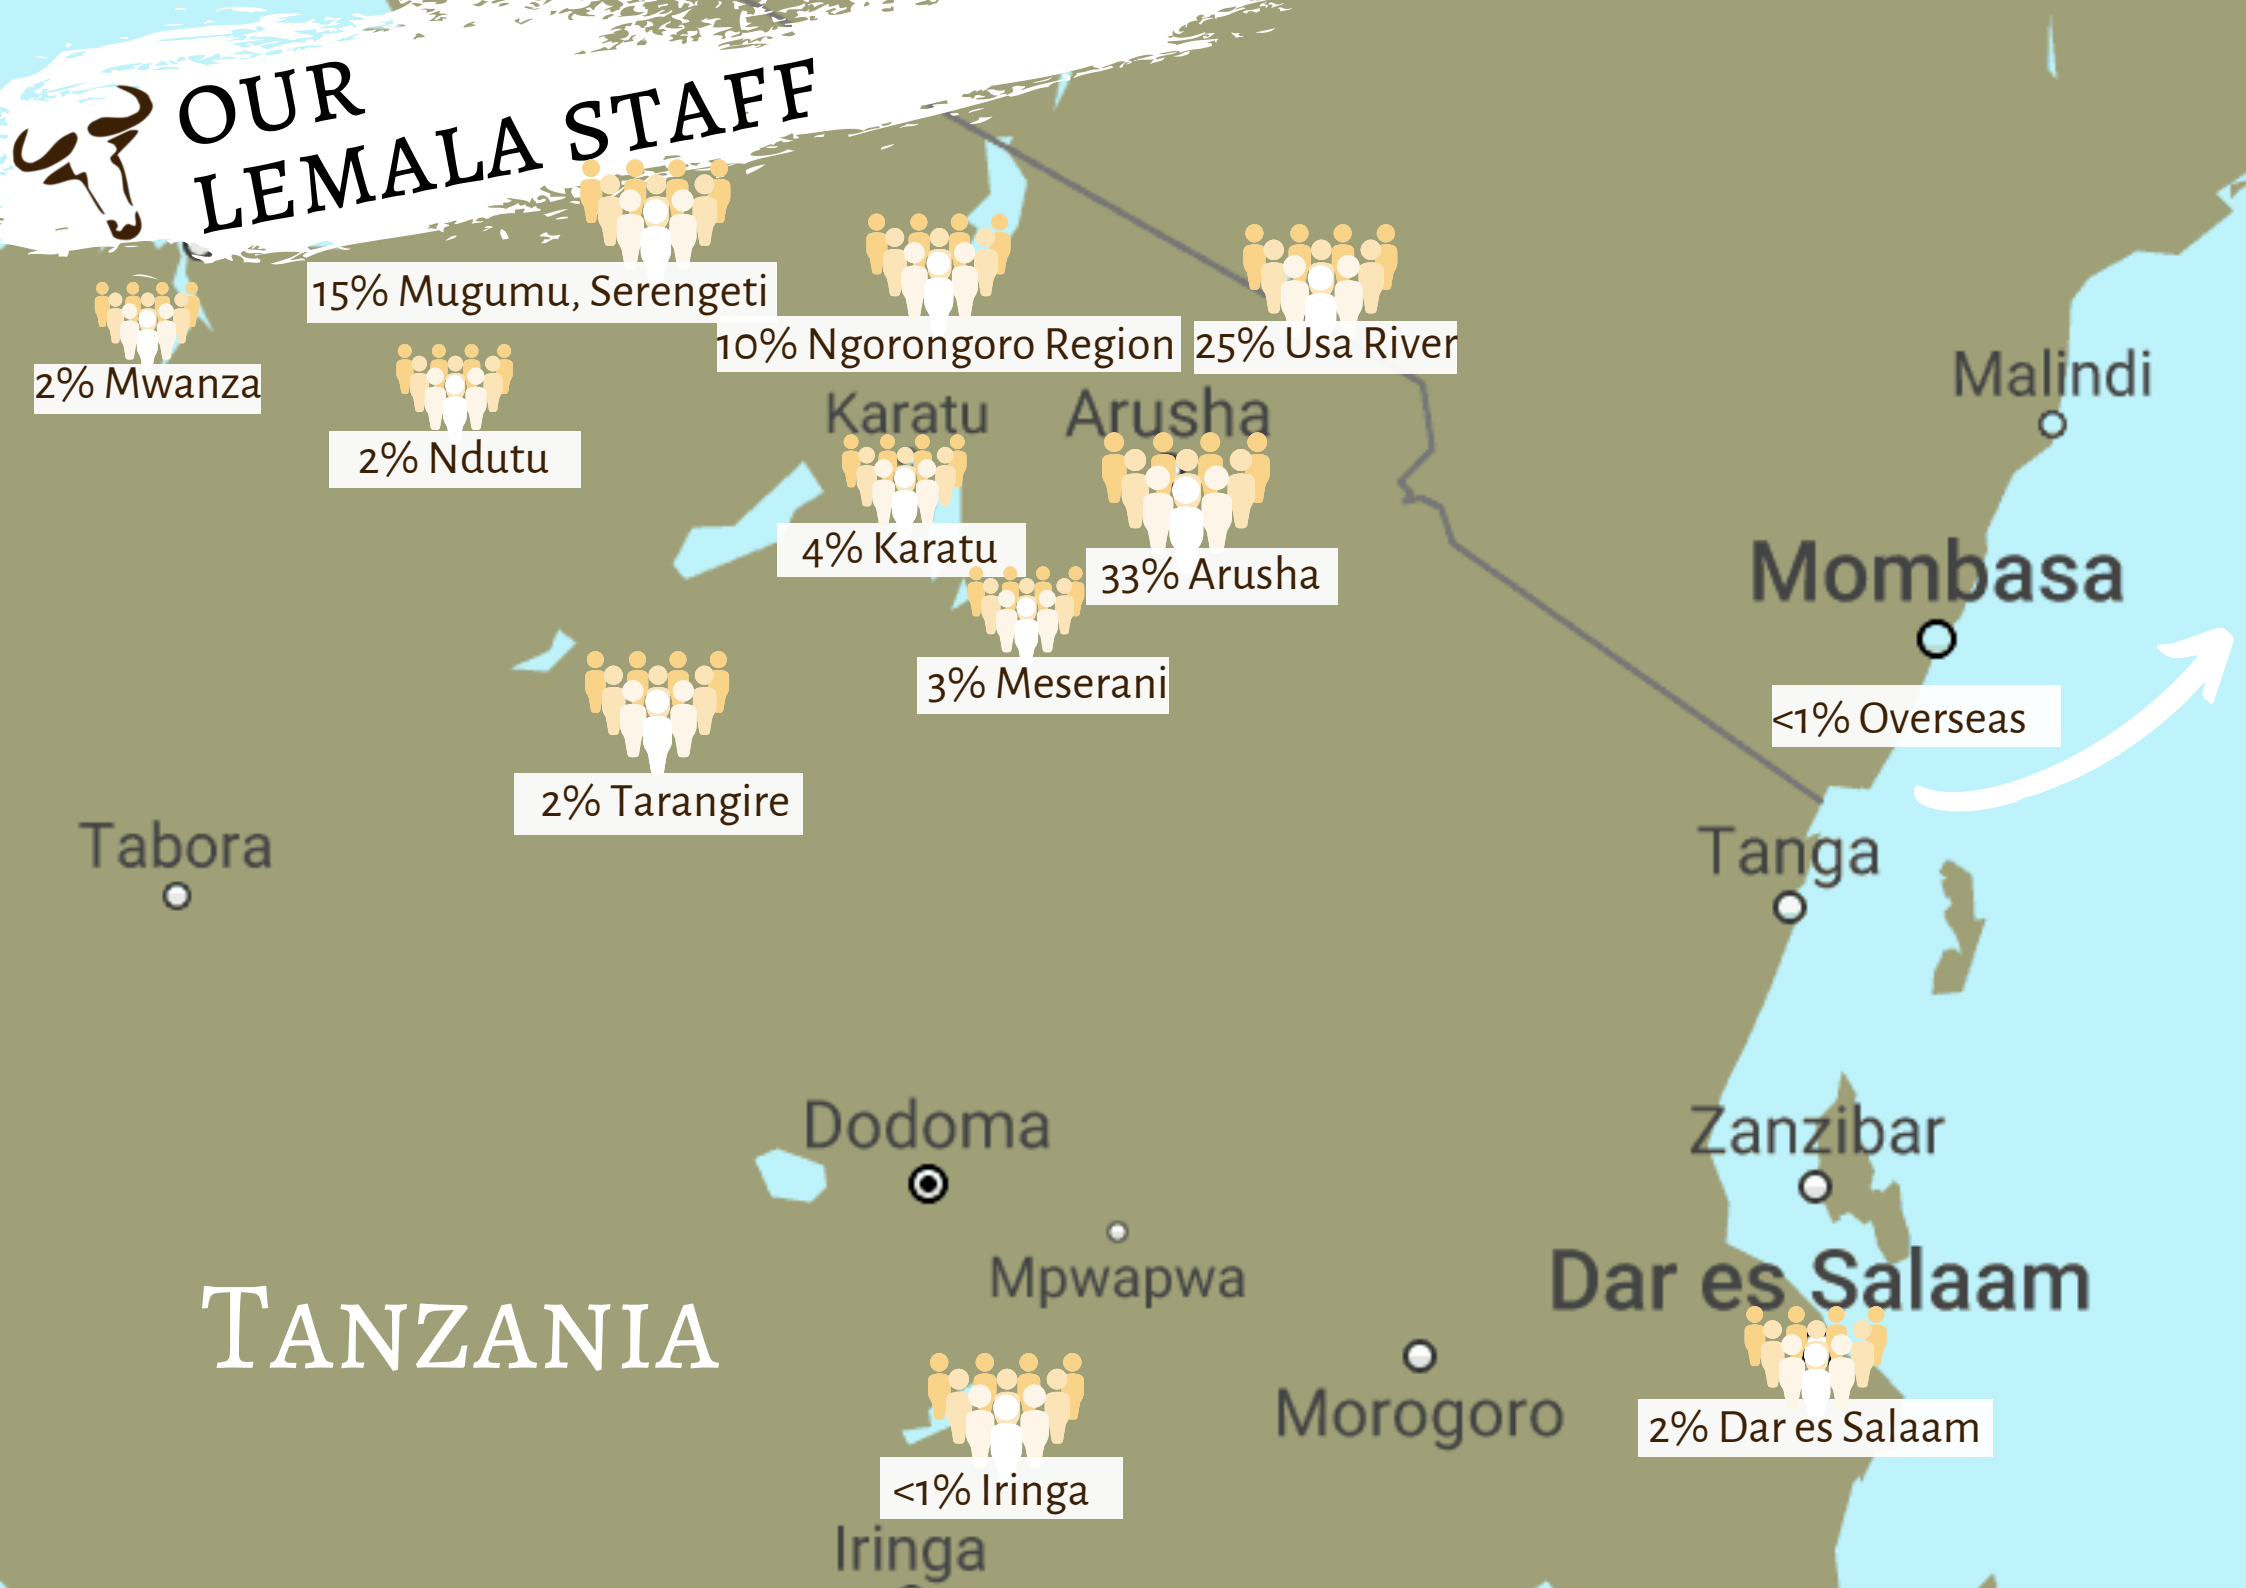

Kilimanjaro, Tanzania
Our dairy products originate from the farms on the slopes of Mt Kilimanjaro, purchasing the final product at their shop in Arusha.

Arusha Central Market, Tanzania
Fresh fruit and vegetables are purchased from the central market and local farms in Arusha Town, supporting all local farmers selling their produce.

Arusha, Tanzania
Dry goods are purchased from Arusha - working with a company who have sourced their goods from surrounding local suppliers. Only 22% of our dry goods are imported, as certain items are not available in Tanzania.

Arusha, Tanzania
Our Meat/Poultry is farmed locally and purchased from our reliable suppliers in Arusha.

LEMALA RESPONSIBILITY

WATER COSTS

Reverse Osmosis Water Systems located at Lemala Lodges, supply the majority of our clean drinking water for all of our properties.

DIESEL COSTS

Solar plants located at Lemala Lodges provide electricity for both the lodges and camps, via inverters. Our small diesel usage is for our back-up generators.
