

MIGRATION EXPEDITIONS

Nxai Pan National Park, Botswana

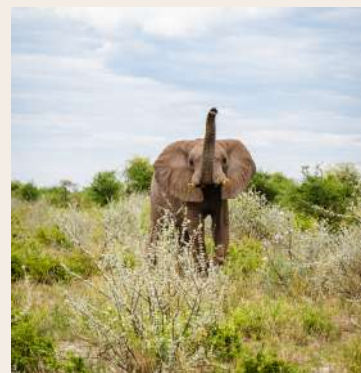

OPEN BETWEEN 01 DECEMBER – 31 MARCH

AN ADVENTURE UNDER THE AFRICAN SKY

Nxai Pan is one of the best places to experience the longest Zebra migration that spans from Namibia to the Nxai Pan, covering over 1000km. The migration occurs in the protected land of the Kavango-Zambezi Transfrontier Conservation Area. Migrations are essential for the ecosystem to avoid over-grazing, and they ensure food sources are optimally used. Predators also benefit, as they follow the zebras and other herbivores and prey on the weak and younger herd members.

Migration Expeditions' eco-sensitive design facilitates a seamless flow between its pristine desert environment and our stylish bush camp. The intimate camp is made up of six luxury canvas tents set on low decks with bucket showers. There are two main area tents consisting of a dining area with an open kitchen on one side and a cosy lounge area opposite. Solar-powered charging points are available for those all-important cameras. The fire circle is at the heart of our bush camp offering and is an extension of the shared lounge area. Its magnetic quality beckons, inviting guests to share an authentic, warm African safari experience with us.

Experience the beauty and tranquillity of Nxai Pan National Park at Migration Expeditions. Sit back and relax on a morning or afternoon game drive in search of the famous Kalahari lions, the large elephant bulls in the area or the Zebra Migration. Try your hand at new photographic techniques in this unique setting or take a half-day trip to the well-known Baine's Baobabs.
